

A gateway to the European Open Science Cloud

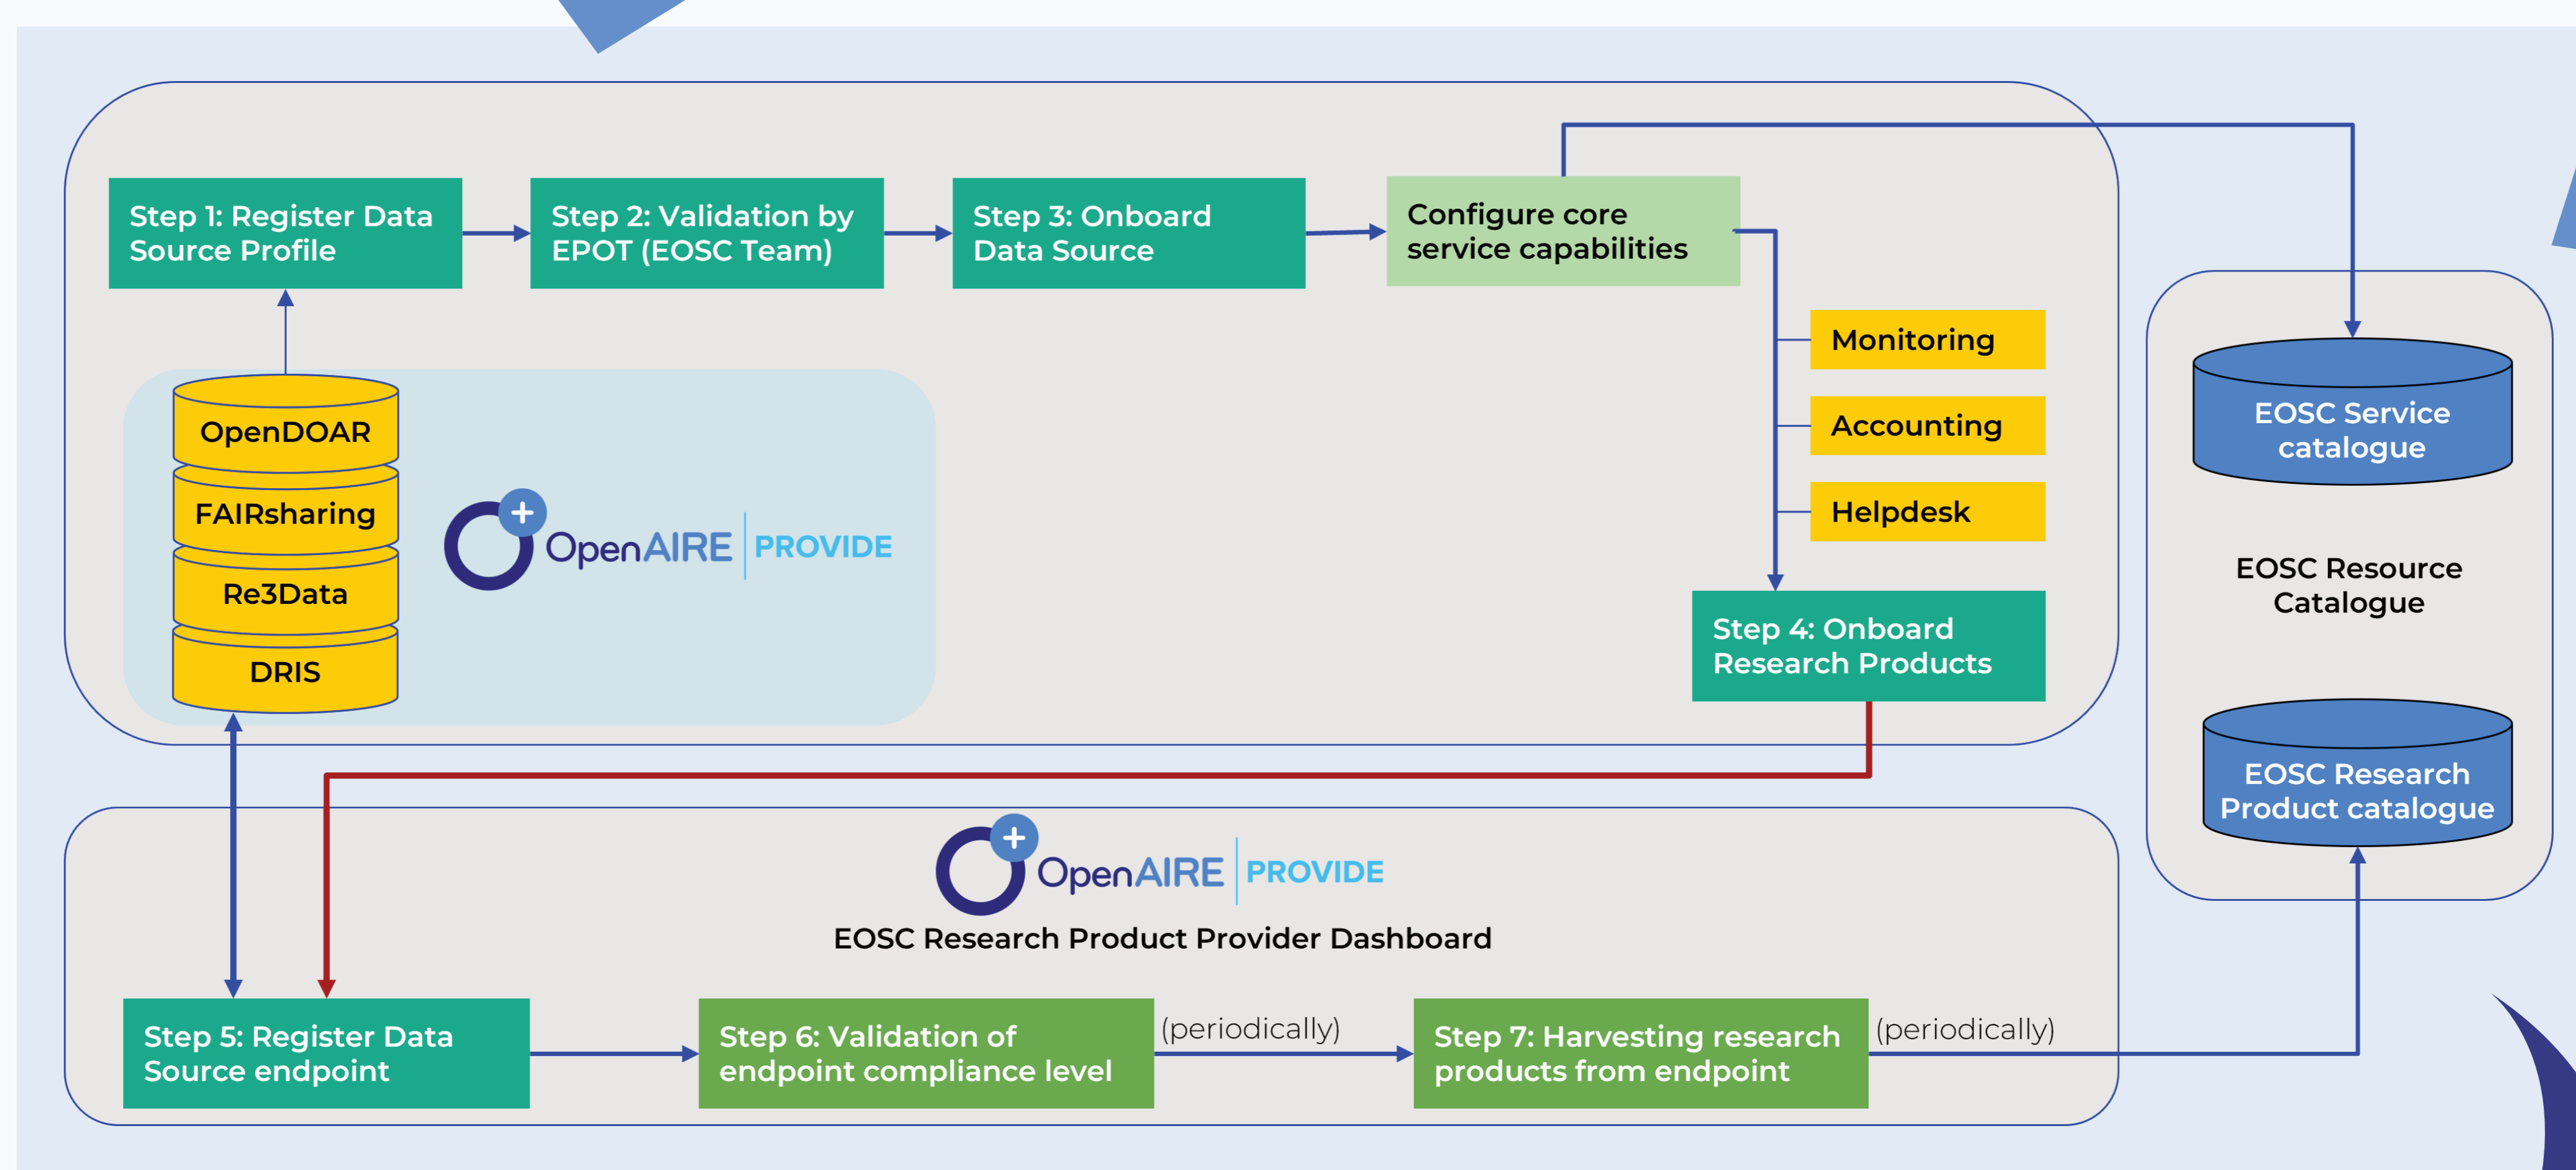

What is PROVIDE?

Is the scholarly gateway that receives content registration requests and provides guidance for content providers by viewing a personalised, user-friendly dashboard that shows the necessary steps and status of the services to complete the process.

Validate and register your data source

using OpenAIRE authoritative registries

Role in the EOSC onboarding

- Interoperability compliance via the OpenAIRE Guidelines.
- Every data source validated in OpenAIRE is EOSC compliant (Guidelines: v3.0, v4.0, data, CRIS)
- Integration of the data sources registration workflow within the EOSC Research Product Catalogue
- OpenAIRE Graph becomes a key asset for discovery and monitoring within the EOSC: <https://graph.openaire.eu/>

Features

Validator service and data source registration.

Collection monitor to track the aggregation history.

OA Broker service offers metadata enrichments.

Usage Counts provides metrics (downloads and views) of data sources.

Benefits

Extending repository metadata models to Open Science practices.

Keeping the collections up-to-date: alerts, enrichments, additions.

Fostering notification-based and federated dissemination of knowledge.

Improve Repository interoperability, collections and content visibility.

Advance Institution memory & research assessment.
